The collection Eclipse Evolution is inspired by the phases of moon and the significance of how it is a constant reminder to always reset, evolve and embrace the new beginnings. The collection showcases versatility, comfort and a sense of confidence in each silhouette. As it is crafted in pure linen it is extremely comfortable and the artisanal art work blended with bleaching technique and later accentuated with kantha stitches sets a very minimal yet prominent tone for the collection.

The collection is amalgamation of comfort, versatility and artisanal work adding more to each garment.
